Thinking about political parties, which party in North Carolina would you say provides the best solutions to our problems?
The state of North Carolina currently spends 17% of its General Fund, or $3.8 Billion on the Medicaid program. In your opinion, is this too much, too little, or about right?
The total spending on Medicaid, including federal and state funds, is almost $14 billion. The program has been plagued by almost annual cost overruns. In your opinion, what is the best way to address these problems?
Government agencies want to collect performance data on students for research purposes. The Department of Public Instruction is implementing a new assessment rating system which would begin with 5 year olds in Kindergarten. The data collected will begin a “child profile,” and be stored electronically in the cloud. With that in mind, would you support or oppose providing parents the ability to opt-out their child from this rating system and data collection?
New assessments for 5 year old students entering kindergarten will rate children both on cognitive areas, such as counting and letter recognition, and also on emotional areas, like emotional literacy and social development. These Child Ratings will be entered electronically into the North Carolina Statewide Longitudinal Data System and used to guide education decision-making and improve workforce development. Do you support or oppose this policy?
Teachers of kindergarten classes will be evaluating students electronically, and may take photos and videos of the child, or their work, to provide evidence of the child’s performance on such areas as emotional literacy, counting, and letter recognition. Currently, teachers are allowed to take photos of a child or their work without written permission by parents or guardian. With that in mind, would you support or oppose a proposal to require schools to obtain written permission from parents before allowing teachers to take photos or videos of a child and their work?
How would you rate North Carolina’s public school system?

- Excellent/Good: 37%
- Fair/Poor: 58%
- Excellent: 4%
- Good: 33%
- Only Fair: 33%
- Poor: 26%

It if were your decision and you could select any type of school, what type of school would you select in order to obtain the best education for your child?
Recently, Nevada became the fifth state to approve Education Savings Accounts for students, commonly called ESAs. ESAs are government authorized savings accounts that place government funds in an account for families and allow parents to use the funds for approved expenses such as tuition, books, and tutoring. In general, do you favor or oppose the idea of “Education Savings Accounts?”
Five states have approved ESA legislation. These states vary in who is eligible for the ESA, ranging from special needs or other specific populations, to all students. If approved by the North Carolina State legislature, in your opinion, who should be eligible to receive an education savings account?

- All students
- Students below the poverty level
- Students in high need populations such as special needs or at risk students
- Students attending failing schools
